Who We Are

“We make books. That is all we do, and we have been doing it since 1990.”

Universal Offsets is a book manufacturer based in Noida, India — two facilities, 1,10,000 sq ft, operating around the clock. Every operation, from pre-press to final despatch, is carried out in-house. We do not trade, sub-contract, or outsource.

We work with a select group of publishers — international academic and trade houses, Indian publishers, and government bodies — who need consistent quality, honest timelines, and a manufacturer who picks up the phone.

We are not the largest printer in India. We are one of the most reliable.

Established	1990 — 36 years in continuous operation
Facilities	Two plants — Noida (HQ) & Hapur, UP — 1,10,000 sq ft total
Operation	24-hour, round-the-clock production
Daily capacity	Approx. 20 lakh sheets / day
Ownership	Family-managed partnership — decisions made directly by the Partners

Who We Serve

We manufacture for publishers across the full spectrum — from international academic houses and trade publishers to Indian educational publishers, government bodies, and children's book specialists. Our certifications and infrastructure are built to meet the audit requirements of both global and domestic clients.

What We Make

We run both web offset and sheet-fed offset under one roof — 9 sheet-fed presses, of which 3 are dedicated 8-colour perfecting presses (4+4), plus web offset capacity, with a complete in-house binding and finishing unit. One facility, one team, no hand-offs.

WEB OFFSET

High-volume text production

Run lengths	25,000 – 5,00,000+ copies
Best for	Paperbacks, workbooks, textbooks
Languages	English, Hindi, regional
Economics	Lowest per-unit cost at volume

SHEET-FED OFFSET

9 presses — 3 dedicated 8-colour perfecting (4+4)

Presses	9 sheet-fed — 3 dedicated 8-colour perfecting
Run lengths	1,000 – 1,00,000 copies
Best for	4-colour trade, illustrated, case bound
Perfecting	4+4 — both sides in a single pass

Complete In-House Binding & Finishing

Binding	Perfect binding, saddle stitch, section-sewn — all in-house
Finishing	Lamination, UV coating, spot UV, hot-foil stamping, die-cutting
Paper	Text paper through to 600 GSM board
Formats	Paperbacks, case bound, hardcover, children's illustrated
Pre-press	In-house CTP / CTCP and colour-managed proofing

New Press Capacity — August 2026 RMGT 920 Installation

A new RMGT 920 sheet-fed press comes online in August 2026 — capacity added specifically for publisher partners requiring higher volume share. If you are planning print volumes for late 2026 onwards, the timing aligns well.

How We Work

Four things publishers tell us matter most — and what we do about each:

We don't overcommit.

If a title's timeline or spec is beyond what we can execute well, we say so before accepting the order.

We keep reserve capacity.

Peak-season surges are where most vendor relationships fail. We structure our calendar to absorb them.

One point of contact.

Family-managed. Decisions in hours, not days. Your production manager talks directly to ours.

Nothing leaves the building unfinished.

Every step — from artwork to despatch — happens in-house. No sub-contracting, no accountability gaps.

Certifications & Compliance

We carry the full compliance stack required by international and domestic publishers. Certificates are current, audited annually, and available on request.

FSC® <i>Chain of Custody</i>	ISO 9001 <i>Quality Management</i>	ISO 14001 <i>Environmental Mgmt</i>	SEDEX SMETA <i>4-Pillar Audit</i>

Also: EcoVadis Rated · Active GSTIN · MSME Registered · NCERT / DAVP Empanelled Vendor

Let's Talk

The best way to understand what we do is to walk the floor. Our Noida facility is an hour from central Delhi — we welcome factory visits from publishers at any stage of evaluation. There is no obligation, no sales presentation. Just the plant, running.

If you would prefer to start with samples, tell us your format — run length, binding, paper spec — and we will have something made and sent to you.

We are selectively taking on new publisher partners in 2026. If the fit is right, we move fast.
